

Allowing users to publish

You can allow users to publish pages to the Production Server at three different levels:

- **Webmaster**

Controlling access to files aned8 Tc/eos

Defining editable areas

To define an editable area by region

Enabling Direct Edit

To approve or deny changes with conditions

3 - Change the Virtual Directory back to standard anonymous user for security

1. Right-click the

Cannot choose "Open" when downloading a file

If you download a file in PureCMS when using Internet Explorer 5.5, the **Open** button on the **File Download** dialog box will not work. The **Save**
